

Replication Codebook for Taxing the Tails

Jude Hays

11/24/2020

Data and Sources

- 1) redistribution2.xlsx (Figure 1)

Original Source: OECD Income Distribution Database (IDD)

<https://www.oecd.org/social/income-distribution-database.htm>

Variables:

- 1) Total: total redistribution by tax and transfer
- 2) Inequality and Redistribution: type of redistribution (categorical)
- 3) Redistribution: Amount of Redistribution by type indicated with (2)
- 4) Tax: Amount of Redistribution by Tax
- 5) Market: Market Inequality
- 6) Post: Post Tax and Transfer Inequality

- 2) lm_enp_7389.xlsx and lm_enp_9014.xlsx (Figure 2)

Original Sources:

Armingeon, Klaus, Virginia Wenger, Fiona Wiedemeier, Christian Isler, Laura Knöpfel, David Weisstanner and Sarah Engler. 2017. Comparative Political Data Set 1960-2014. Bern: Institute of Political Science, University of Berne.

J. Visser, ICTWSS Database. version 6.1. Amsterdam: Amsterdam Institute for Advanced Labour Studies (AIAS), University of Amsterdam. November 2019.

<https://www.ictwss.org/downloads>

Variables:

- 1) System: Wage or Party
- 2) Score: Level of Wage Bargaining Coordination or Effective Number of Parties
- 3) Redistribution: Party Score - Wage Score
- 4) Maj: Majoritarian Electoral System Indicator

- 3) consumption.dta (Figure 3)

Original Sources:

OECD National Accounts Data. Final Consumption Expenditures of Households.

https://stats.oecd.org/Index.aspx?DataSetCode=SNA_TABLE5

Revenue Statistics - OECD countries: Comparative tables (Central Government, Tax Revenue, General Taxes on Goods and Services, 5110)

<https://stats.oecd.org/Index.aspx?DataSetCode=REV>

Variables:

- 1) con_tr: Effective Consumption Tax Rate (Revenues / Expenditures)
- 2) mix: PR and Mixed PR Electoral System indicator

- 4) capital.dta (Figure 4)
 Original Source: OECD Taxation of Corporate and Capital Income.
https://stats.oecd.org/Index.aspx?DataSetCode=TABLE_II4

Variables:

- 1) dividend: Overall (corporate plus personal) tax rate on distributed profit
- 2) mixed: PR and Mixed PR Electoral System indicator

- 5) final_analysis_data.dta (Regression Analysis)

Armingeon, Klaus, Virginia Wenger, Fiona Wiedemeier, Christian Isler, Laura Knöpfel, David Weisstanner and Sarah Engler. 2017. Comparative Political Data Set 1960-2014. Bern: Institute of Political Science, University of Berne.

Gygli, Savina, Florian Haelg, Niklas Potrafke and Jan-Egbert Sturm (2019): The KOF Globalisation Index – Revisited, Review of International Organizations, 14(3), 543–574.
<https://kof.ethz.ch/en/forecasts-and-indicators/indicators/kof-globalisation-index.html>

Variables:

- 1) openc_new: Openness of the economy, measured as total trade as a percentage of GDP, in current prices.
- 2) gov_left1: cabinet posts of social democratic and other left parties in percentage of total cabinet posts.
- 3) sstran: Social security transfers as a percentage of GDP.
- 4) interest: Long-term interest rate on government bonds.
- 5) lfirstp: time-variant proxy for Lijphart’s first ‘parties-executives’ dimension.
- 6) lfed: Index of Federalism.
- 7) kaopen: Chinn and Ito index for the degree of openness in capital account transactions.
- 8) eu: Indicator variable for EU member states from year of accession.
- 9) emu: Indicator variable for EMU member states from year of accession.
- 10) gov_right1: cabinet posts of right-wing parties in percentage of total cabinet posts.
- 11) inflation: Growth of harmonised consumer price index (CPI) from previous year.
- 12) unemp: Unemployment rate. Percentage of civilian labor force.
- 13) ele_lag: Election indicator variable, one-year lagged.
- 14) KOFFiGI: KOF Financial Globalisation Index
